Lei Gao

UCL Interaction Center, Multi-Sensory Devices Group
169 Euston Road, London, NW1 2AE
Email: lei.gao.20@ucl.ac.uk

I'm focusing on Human-Computer Interaction (HCI), especially in creating new interactive prototypes using advanced methods like Acoustic Levitation. I'm also interested in Haptics, VR/AR/XR systems, and using data-driven methods to develop effective applications.

Education

- 2020-Present **PhD of Computer Science in HCI** **University College London, UK**
  Supervisor: Prof. Sriram Subramanian
  Funded by UCL Research Studentship (EU Horizon 2020)
- 2017-2020 **Master of Engineering in Computer Technology** **Xidian University, China**
  Supervisor: Prof. Bo Wan
- 2013-2017 **Bachelor of Engineering in Digital Media** **Shandong University, China**

Research experience

- 2020 – Present **Building Applications Using Acoustophoretic Interface** (PhD thesis topic)
  - My research seeks to adopt the acoustic levitation technique to build reconfigurable and multi-modal prototypes and artifacts with enriched materiality.
  - Develop and present a design framework and construction platform that enables a range of applications through an acoustophoretic interface, featuring dynamic, captivating, and expressive data physicalizations. Besides, build innovative fabrication prototypes by acoustic levitation.
  - Enhance the stability and robustness of real-world levitation, contributing the original dataset and detecting/enhancing strategies using AI methods.
- 2019 – 2020 **Multi-user interactions in Augmented Reality** (Master thesis topic)
  - Propose multi-user interaction model in Augmented Reality (AR) and develop a collaborative AR system enabling multimodal interactions, showcasing advancements over conventional collaboration methods.
- 2018 – 2020 **Culture learning in Virtual Reality**
  - Compare the culture learning performance (knowledge, behavior, attitude) in VR and non-VR scenarios through quantitative studies.
- 2017 – 2019 **Code classification for C programming assignments**
  - Design a neural network-based algorithm to detect code similarity and develop a clustering method that categorizes solutions for programming assignments

Visiting, invited talks, symposium

- Modern Magic Tricks: Mid-air displays using acoustic levitation. (2022/May/25 visiting Xidian University)
- DataLev: Mid-air Data Physicalisation Using Acoustic Levitation. (2023/May/25 visiting Institute of Software, Chinese Academy of Sciences)
- Post-CHI XR summer school (2023/May/2-3 at University of Copenhagen)
- Symposium of Extended Reality (2023/May/4 at University of Copenhagen)

Teaching experiences

- COMP0160 Perception and Interfaces (23-24), University College London

- PSYC0095 Future Interfaces (22-23), University College London
- COMP0113 Virtual Environments (21-22), University College London
- COMP0021 Interaction Design (20-21), University College London
